

Original equipment quality for increased safety

"Made by MAHLE" quality - no compromise

As our customers' innovative supply partner, we offer an extensive spare part range in original equipment quality for the Aftermarket. Hence, commercial partners, repair shops, and engine rebuilders worldwide have a broad product range available for maintenance and engine repair: pistons, cylinder liners, piston ring sets, bearings, assemblies, valves, valve train components, as well as air, oil, fuel, and cabin air filters, and other components for engines and engine peripherals. We supply all Aftermarket products in completely identical "Made by MAHLE" original equipment quality: for all brands within the MAHLE Group.

Our regional organizations ensure reliable and fast availability of the spare part range anywhere in the world—with distribution companies in Germany, France, Spain, England, Poland, China, Japan, India, Australia, USA, Canada, Mexico, Brazil, and Argentina, as well as a sales office in Dubai/U.A.E. and Sweden. Numerous accolades from our customers attest to the high level of service quality and flexibility. With individual concepts relating to training, specialized trade, and workshops, as well as comprehensive Aftermarket catalogs and online databases of our products, we offer our customers complete service and best support worldwide.

The MAHLE aftermarket catalog and online databases for engine components and filter systems serve as indispensable reference tools for every professional. They can be found at:
